MEMORANDUM

TO: Rob Alvey, Geologist

FROM: Stephen Cipot, RPM

DATE: April 30, 2004

RE: Requested Review of the Remedial Action Work Plan For Source Reduction,
L.E. Carpenter Superfund Site, Wharton, NJ

A Remedial Action Work Plan For Source Reduction, was submitted by the PRP for the L.E. Carpenter Superfund Site in Wharton, NJ. The purpose of the submittal is to provide documentation to support the outlined approach to remove lead impacted soils to 400 PPM, remediate process wastes and LNAPL impacted soils. After you have completed your review, please provide comments to my attention within a 30 day time frame, by May 31. Please let me know if this date will not work. In addition, please forward the comments via email, so as to facilitate inclusion in the preparation of a subsequent comment letter. Please also note that the PRP's contractor has requested a meeting to go over comments and issues we might have, within a short time frame.

Thank you, in advance, for your attention to these matters.
